CAREER OBJECTIVE

Computer Science graduate with a strong interest in Machine Learning, Deep Learning, and Natural Language Processing, eager to apply analytical and modeling skills to extract insights from data. Looking for opportunities to contribute to data-driven projects while continuing to learn and grow in the field of AI and predictive analytics.

TECHNICAL SKILLS

Programming Languages: Python, HTML, CSS, JavaScript, SQL

Frameworks & Tools: TensorFlow, Keras, Flask, OpenCV, NLTK, Bootstrap, YOLOv5, Tkinter,MySQL, XAMPP

Developer Tools: Google Colab, Visual Studio Code, PyCharm, MySQL Workbench, Git, XAMPP

Libraries: Matplotlib, Seaborn, EasyOCR, SpeechRecognition, NumPy, Pandas, Scikit-learn, Plotly,Streamlit, Pillow, BeautifulSoup, Requests

INTERNSHIP

Data Science Intern - Lpoint , Mangaluru **Oct 2024 - July 2025**

- Developed and deployed ML models for face recognition, emotion detection, and spam classification using Python, TensorFlow, and OpenCV.
- Built real-time video/image detection systems for PPE detection, traffic congestion, and license plate extraction.
- Developed full-stack web apps using Flask, SQLite, and Bootstrap with real-time prediction UI.
- Constructed multi-modal spam detection systems for text, image, audio, and email spam.
- Built dashboards with Matplotlib and Seaborn for real-time data visualization and sentiment analysis.
- Used Git for version control, API integration, and deployment pipelines.

PROJECTS

Spamshield - Multi-Modal Spam Detection App Github

Development Tools:Flask, TensorFlow, NLTK, Bootstrap

- Developed a multi-modal spam detection app (text, image, audio, CSV) achieving 98.6% accuracy.
- Built a real-time dashboard with prediction logs and visual metrics for performance monitoring.

Construction Site PPE Detection System Github

Development Tools: YOLOV5, OpenCV

- Real-time video detection of safety equipment on workers, achieving 90% compliance accuracy.

Suicide Depression Detection System Github

Development Tools: Python, NLP, Tkinter, SQLite, OpenCV

- Machine learning model to detect depression or suicidal tendencies with 85%+ accuracy using NLP and real-time text analysis.

Water Quality Analysis Github

Development Tools: Google Colab, Python

- Performed EDA and impurity classification on 50 features from water quality datasets.

EDUCATION

St Joseph Engineering College, Mangalore | Master of Computer Applications | 2023 - 2025
Alva's College, Moodbidri, | Bachelor of Com puter Applications | 2020- 2023
Jain PU College, Moodbidri | Commerc e in Computer Science | 2018 - 2020
Jain High School, Moodbidri | SSLC | 2018 - 2016
